Quality construction built on reputation

Aspley Guise and Woburn Sands Golf Clubhouse

Sector:	Commercial/Leisure
Client:	Aspley Guise & Woburn Sands Golf Club
Budget:	£968,000
Duration:	9 months
Completion:	November 2003
Architect:	Sansome Hall

Project specifications:

The golf club operated as normal as possible during the club house construction works. This required a great deal of pre-planning and awareness of the client requirements to ensure that disruption was minimum. The building is partly constructed using traditional methods and part steel frame. The walls are of brick outer leaf and block work inner leaf, insulated to provide a highly energy efficient building. The roof was finished in copper.

This building was very complex to build given its shape and required great care and attention to detail. The project was completed on time to very high standards.
