## Bedford Street, Covent Garden

**Client:** Galliford Try Construction South Ltd

**Sector:** Supply & Fix Joinery Packages

**Budget:** £33,000

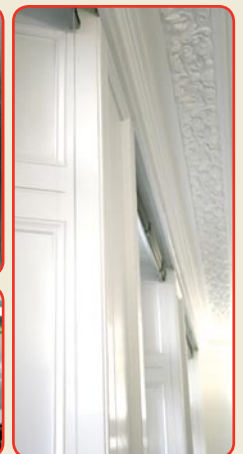

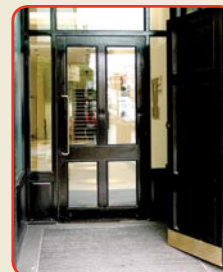

**Duration:** 8 weeks

### Project specifications:

M J Hillson Limited were contracted to supply and install specialist joinery works to a listed building that was being converted into shops, just off the main square of Covent Garden. M J Hillson Limited produced panelled full height window surrounds, in keeping with the Victorian period, which included a cornice to the ceiling. The shop front included panelled sections to the top and bottom as well as double swing doors with brass ironmongery. To ensure that the service cupboard was concealed but accessible in the main reception area, M J Hillson Limited designed a floor to ceiling multi panelled system with shadow gaps that was secret fixed on battens. Access to the cupboard being via white spray painted boards that are lifted off with glass suckers.

### Conclusions:

The challenge of working in the centre of London, with the lack of storage areas and difficult access for delivery constraints, were overcome as M J Hillson Limited produced a high quality of workmanship and design which maintained the characteristic of the existing building with the works being completed on time

“We were pleased with the high quality of workmanship and the bespoke items that were made. Problems that were encountered were professionally overcome by the site team. We look forward to working with M J Hillson again.”
