Bishops Justus School, Bromley

Client: Norwest Holst Ltd
Sector: Supply & Fix Joinery Packages
Budget: £1,000,000
Duration: 54 week contract

Project specifications:

M J Hillson Limited's order was based on three specialist supply & fix packages. These consisted of external cedar cladding, structural roof works, internal door-set and glazed screen fit-out. The cedar cladding consisted of a timber frame panelling system with cedar boarding fixed to battens to form art block class rooms on the roof of the building. Part of the external specification was an environmentally friendly grass covered roof. M J Hillson Limited constructed Eternit clad plywood roof lights for passive light and air ventilation walkways. The internal door-sets were maple faced with solid maple frames including ironmongery, walnut architrave and skirting. Glazed screens and gallery windows were also included in this package. All materials were procured from sustainable sources with the aspect focused on the eco side to the construction of the building with particular reference to the FSC guidelines.

Conclusions:

The environmental issues were quite demanding but fully achieved. The programme was met and hand over achieved. Labour was resourced locally which worked very well not only for the project but also for the ease of last minute and urgent variation works. There was a total of sixty door variations to deal with. This was a challenge in itself.

This was as a very complex job executed well and completed on time. Good achievement by all involved.

Dave Ruggles, Norwest Holst, Senior Surveyor
