Epping Forest College

Client: Morgan Ashurst
Sector: Supply and Fix Joinery Packages
Budget: £460,000
Duration: 20 weeks
Project specifications:

M J Hillson Limited were contracted to supply and fix door sets and ironmongery, glazed screens, skirting's, pipe boxings and fascia to internal balcony's. All materials were pre-finished Ash. The specification included 30 minute fire doors and also 60 minute fire doors, timber glazed screens at location of entrances and to library areas and also classrooms. All classroom doors had access controlled door furniture. Ash fascia and capping were installed from cherry pickers and scissor lifts due to no scaffold supplied at these locations. All doors were pre-finished ash veneer.

Conclusions:

All of the works were carried out on levels 1 to 5 and split into three locations, east, central, west elevation. Problems arose with loading materials to the required areas due to the hoist being only at one location. All materials were carried from the hoist with trolleys. There were also concerns for the storage of Ash materials and veneered doors that were vulnerable to damage and would require a final coat of sealer for protection after installation. Due to a revised programme works progressed at a fast pace to enable completion in preparation for college opening. Completion date was met by increased labour and supervision, whilst ensuring that errors were avoided. Work was completed to a very high standard.

“The pragmatic, proactive and professional attitude of Poochee and team made for a well managed operation. It is so very satisfying to work with a company that is well staffed at the sharp end! I look forward to repeat the experience soon.”

Lindsay Matthews, Site Project Manager, Morgan Ashurst Ltd
