

CASE STUDY

Napier Place

Client: Knight Harwood Ltd
Sector: Supply & Fix Joinery Packages
Budget: £90,000
Duration: 12 weeks
Project specifications:

This development comprised the construction of 4 residential units in an existing office building. M J Hillson Limited supplied and fixed oak panelled doors, with painted frames and high quality stainless steel Franchi door ironmongery. Other works included the staircase and balustrade, bathroom joinery complete with mirrored cabinets above vanity units, full height wardrobes and an external bin store.

Conclusions:

After the building was gutted, the priority was to fit a dog-legged staircase with half landings, as the staircase area was the only means to move from one floor to the other. M J Hillson Limited completed the staircase in a limited time period working evenings and at weekends. The staircase had ramps and wreaths in oak, which were varnished with white spindles. The fit-out of the flats was to a very high standard, some with solid oak panelled doors and others with painted panelled doors. The 75mm torus architrave and 219mm torus skirting gave a luxurious look as did the concealed door flush with the wall on a push catch system, with ornate A&H brass circular vents in satin chrome. M J Hillson Limited produced a high standard of workmanship in a very short lead time in central London with no storage and restricted delivery.

“The works were completed on programme and to a high standard of quality which both the client and architect expressed compliments at PC. We look forward to working with Mark Hillson and his team in the near future.”

Jason Friel, Project Manager Knight Harwood Ltd.
