Newnham College Kitchens, Cambridge

Client: Bluestone (Cambridge) plc

Sector: Supply & Fix Joinery Packages

Budget: £350,000

Duration: 47 week contract

Project specifications:

The contract was let in two packages; roof and internal joinery. The roof works incorporated both cut rafters and truss rafters. The internal joinery incorporated the supply and fix of bespoke oak doors and paint grade door-sets. Also installed was the high specification acoustic oak panelling to the main events room, incorporating oak bench seating, skirtings and architraves. Timber meter cupboards and timber bin stores were also added to our project later as variation work.

Conclusions:

A complex job with intricate detailing added to a challenging project. The project was completed successfully to a very high standard. Variation works were added on a daily basis with a demanding effect on the programme. These variations were resourced accordingly so as to not hinder the works in any way. The hand over was achieved through close contact with the Architect on design issues.

After some procurement problems and design issues the project was handed over successfully to a high standard. Good job.

David Palmer, Bluestone
