Selwyn College, Cambridge

Client: Bluestone (Cambridge) plc

Sector: Supply & Fix Joinery Packages

Budget: £600,000

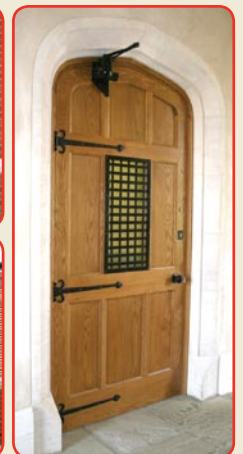

Duration: 48 week contract

Project specifications:

The contract was let in two packages; roof works and internal joinery. The roof works consisted of cut timber rafter sets on steel girders incorporating Iroko Dormer Window Pediments. The Iroko Pediments were designed and built by M J Hillson Limited. The joinery package consisted of paint grade timber door-sets and external solid pre-finished oak doors and windows. Ten inch paint grade skirting and three inch architraves were part of the installation specification. The external oak windows were fitted with specialist inward opening ironmongery. All external oak windows and doors were bespoke design. Also included were the fitting of oak handrails to the staircases and bespoke wardrobes and toilet partitions.

Conclusions:

A challenging, very complex and high standard project. The design elements and intricate detail were met head on by M J Hillson Limited and executed extremely well and to a very high standard of fit and finish. The high standards were achieved by very experienced labour and organised management controls. Hand overs were achieved on programme with minimal snagging.

“The quality of the workmanship could not be faulted. Standards were high and impressive. After a lot of design issues and procurement issues, the project was completed successfully.”

Nigel Arnold, Contracts Manager, Bluestone
