

CASE STUDY

Warwick University, Digital Laboratory

Client: Norwest Holst
Sector: Labour Only Joinery Package
Budget: £310,000
Duration: 22 weeks
Project specifications:

This project consisted of all aspects of carpentry and joinery, from 1st fix to 2nd fix through to final fix and ironmongery. During this project M J Hillson Limited also had to form MDF reveals around the large windows and create a very precise and particular detail around the window with a 2mm chamfer on the edge of the MDF. The project involved working closely with other contractors and project management teams in order to achieve the finer details that the architect had envisaged, whilst using new and different materials and products to create this unique working environment.

Conclusions:

The building, which was completed on time, will give students a world class facility to work in. Also, the well-considered layout and design of the building creates an abundance of light and space.

M J Hillson Limited carried out these works to a good standard of workmanship they took on board and maintained the site programme and also kept a good health and safety record onsite.

Sandesh Kale, Site Manager, Norwest Holst
