

# CASE STUDY

## Whitton School, Twickenham

**Client:** Bluestone (Reigate) plc

**Sector:** Supply & Fix Joinery Packages

**Budget:** £90,000

**Duration:** 20 weeks

**Project specifications:**

MJ Hillson Limited were contracted to design, supply and install the intricate timber roof, and the roof construction formed the two story rotunda feature ceiling within the social area. The joinery package consisted of beech crown cut veneered door-sets with vision panels, beech architraves and MDF skirtings. The works also included Higrade, blue plastic coated ironmongery. A kitchen for the staff room and shelving system was also required.

**Conclusions:**

Whitton School had an unusual design, the buildings central feature being a rotunda, which then had square rooms with curved corridors adjacent to it. The doors leading from the rotunda, therefore had to have curved sections to the linings and the skirting had to be carefully bowed around the walls. The doors were of a high finish and quality, which was matched by the quality of the tradesmen through out.

**A beautiful purpose built centre. Many other boroughs have come to see the design as a blueprint for themselves. It was finished exactly on time- the design and building team are to be highly recommended.**
